Zainab Fayyaz

.NET Developer | Full Stack Developer

Lahore, Pakistan | +92 324-7949009 | zainabfayyaz207@gmail.com | linkedin.com/in/zainab-fayyaz | github.com/zainab-f207

Professional Summary

Computer Science graduate and .NET Developer with hands-on experience building full-stack applications using C#, ASP.NET Core, .NET Framework, Entity Framework, SQL Server, REST APIs, and React.js. Experienced in developing APIs, database-driven applications, authentication, and third-party integrations through internship and academic projects.

Technical Skills

Programming Languages: C#, Python, JavaScript (ES6+), SQL, HTML5, CSS3

Frameworks & Libraries: ASP.NET Core, ASP.NET Web API, ASP.NET MVC, ASP.NET Web Forms, .NET 8, .NET Framework, Entity Framework / EF Core, FastAPI, scikit-learn, React, Tailwind CSS, SignalR (WebSockets), OpenCV

Tools & Platforms: Visual Studio, VS Code, Git, GitHub, SQL Server, MySQL, PostgreSQL, ADO.NET, ASP.NET Identity, Vercel, Render, Google Gemini API, SMTP

Professional Experience

Full Stack Web Developer Intern — SimpleLogix, Lahore, Pakistan *Jul 2025 – Oct 2025*

- Developed and maintained full-stack web applications using .NET Framework, C#, Entity Framework, JavaScript, and SQL Server, building responsive and reusable user interfaces.
- Developed and integrated RESTful APIs to support communication between frontend and backend components while maintaining application performance and data integrity.
- Implemented database integration and CRUD operations using Entity Framework and SQL Server across multiple application features.
- Collaborated with senior developers on code reviews, debugging, and performance improvements; participated in daily stand-ups, sprint planning, and Agile/Scrum development.

Key Projects

Nigehbaan – Pakistan's Guardian Network *ASP.NET Core 8, C#, EF Core, React,Tailwind CSS, SignalR*

- Built a full-stack disaster response platform using ASP.NET Core Web API and React with JWT authentication and role-based access control across Admin, Responder, and Citizen roles.
- Built an automated responder-assignment engine mapping 19 disaster types to the nearest of 47 responder organizations across 8 Pakistani cities using Haversine distance and priority ranking.
- Implemented GPS-based geofencing that auto-updates responder status at 100m and 20m thresholds, and integrated SignalR for real-time alerts, GPS tracking, and team chat.

ResumeCraft Pro – Automated Resume Generator *ASP.NET Web Forms, C#, SQL Server*

- Built a full-stack resume builder using ASP.NET Web Forms, C#, and SQL Server, with ADO.NET and parameterized queries to prevent SQL injection; structured into DAL, BAL, and Model layers with role-based access control.
- Built a template engine supporting 10 resume templates, with export to PDF via iText7 and to DOCX via the Open XML SDK.
- Designed an ATS match-scoring engine that parses job descriptions into weighted keyword requirements and computes a 0–100 match score, with a regex-based fallback when AI providers are unavailable.

SafeVision – Spatial Visualytics of Reported Incidents in Lahore *Python, FastAPI, React, MySQL*

- Built a full-stack crime analytics platform using FastAPI, React, MySQL, and Leaflet, serving prediction, dashboard, and alert features to end users.
- Trained a Random Forest classifier on 25,440 FIR records across 31 areas and 18 crime categories, using 5-fold cross-validation on imbalanced classes.
- Built an Urdu FIR processing pipeline using Gemini 2.5 Flash, EasyOCR, and Tesseract with OpenCV preprocessing and fuzzy matching against 265 Lahore locations at 0.75 similarity.

Education

BS Computer Science – National University of Modern Languages (NUML), Lahore *2022 – 2026*
Coursework complete; final transcript pending

Intermediate in Computer Science – Punjab Group of Colleges *2020 – 2022*
Percentage: 89%

Certifications

HEC National Skills Competency Test (NSCT) – 88.1 percentile nationwide (Higher Education Commission, in collaboration with MoITT, PSEB, and P@SHA), 2026
